

Glover Case Study

Glover: Transforming Gift Card Transactions with Google Cloud and Deimos

As the chosen partner, Deimos's role was to collaborate with Glover in migrating their operations to the Google Cloud Platform (GCP), ensuring a seamless transition to a more secure and scalable environment. Moving Glover from on-premise to the cloud, was a seamless project with the expertise Deimos brings to the table.

THE CHALLENGE

Glover faced the challenge of modernising their gift card platform, needing to enhance security, scalability, and overall operational efficiency to meet the demands of their growing user base.

THE SOLUTION

Using Google Cloud Platform, Deimos devised a comprehensive strategy for Glover's migration to GCP. This involved leveraging various GCP tools and services to address specific challenges and ensure a smooth transition to the cloud.

Solution Pillars

- Infrastructure Modernisation
- Application Modernisation

Products

THE RESULT

Glover successfully transitioned to Google Cloud Platform, experiencing heightened security, improved scalability, and operational efficiency. The implementation of GCP tools streamlined their gift card transactions, marking a significant leap in their digital transformation journey.

ABOUT GLOVER

Glover is the best platform to buy and sell gift cards in Nigeria at best rates. You can also convert Amazon, steam, and Google Play gift cards to naira.

Industry: Financial Services

Location: Nigeria

“

The collaboration with our Google Cloud partner Deimos was transformative. The migration enhanced our platform's capabilities, providing our users with a more secure and seamless gift card experience.
