Infinitus Revamps Nigeria's Food Industry with Google Cloud Tools

Deimos built a secure, scalable Kubernetes environment for Infinitus using its blueprint and Google Cloud best practices. The solution streamlined operations, improved insights, and ensured reliable delivery of fresh products across Nigeria.

THE CHALLENGE

Infinitus, operating in Nigeria's high-stakes food sector, faced complex logistical challenges managing highly perishable products. They required a robust platform to enable rapid innovation and deployment of tailored solutions to address their unique needs.

THE SOLUTION

Deimos partnered with Infinitus to design a secure, scalable Kubernetes environment using Google Cloud best practices. Leveraging Google Kubernetes Engine for orchestration, BigQuery for real-time insights, and Pub/Sub for seamless communication, the solution streamlined operations and enabled agile responses to supply chain demands.

Solution Pillars
- Infrastructure Modernisation
- Observabiility

Products

Google Cloud

Google Big Query

THE RESULT

Infinitus significantly reduced operational overhead, optimised their supply chain, and improved responsiveness to market needs. Enhanced data insights and automation minimised waste, ensured reliable delivery of fresh products, and elevated customer experiences through personalised CRM solutions.
