

Is your current infrastructure expensive, inflexible, unreliable?

40%

of SMBs cited outdated skill sets in IT as a key barrier to meeting business and technology priorities

The cloud levels the playing field.

31%

Average savings with cloud

Companies that subscribe to cloud services, on average, say they save 31% compared to onsite infrastructure.²

69%

Average downtime reduction

With resiliency architected in the cloud from the ground up, you get more reliability and on average a 69% reduction in unplanned downtime.³

The clear business benefits of the cloud have made it the #1 IT priority for companies with fewer than 1,000 employees.⁴

- »» The highest level of cloud security
- »» Built in reliability and resiliency
- »» Real savings you can see and measure
- »» Capacity that grows as you need it
